IN 10-15 MINUTES**

EXTREME ADHESION

CR MENDER

This product is a plural component, low viscosity, rapid cure polyurea crack and spall repair material. The extended pot life makes it very user friendly in all climates and temperatures. This versatile product can be used either as a stand-alone material, or mixed with dry sand. CR Mender is perfect for rebuilding cracks, expansions, and missing sections of concrete. 1:1 mix ratio.

ADVANTAGES

- > Long Pot Life
- > Rapid Cure Times
- > Extreme Adhesion
- > Multiple Uses
- > Vertical Applications
- > High Build
- > Cost Effective

TYPICAL APPLICATIONS

- > Spalling
- > Crack Repair
- > Large Surface Repairs
- > Vertical Repairs
- > Damaged Steps
- > Joints
- > Deep impressions

ALSO AVAILABLE – CR PATCH AND COAT

This plural component system is a high viscosity concrete repair putty, designed to fill cracks and small pits. The unique chemistry allows you to patch cracked concrete and coat over the top with no cure time. Self-cure technology reduces down time and allows repairs to be made on the fly.
